

## alpha-Amylase Activity Assay kit

---

Amylase is responsible for hydrolyzing starch, including alpha-amylase and beta-amylase. alpha-Amylase (EC 3.2.1.1) can randomly act on alpha-1,4-glycosidic bonds in starch to generate reducing sugars such as glucose, maltose, maltotriose, dextrin, etc., while reducing the viscosity of starch, so Also known as liquefaction enzyme.

Reducing sugar reduces 3,5-dinitrosalicylic acid to produce brown-red substance. beta-amylase is not heat-resistant, and it is inactivated at 70°C for 15 minutes to determine the activity of alpha-amylase.

Catalog No.	250061
Size	50 Assays / 100 Assays
Product Category	Enzymatic / Metabolic Assay
Detection Method	Visible spectrophotometry
Storage/Stability	2 ~ 8°C/1 year
Shipping	Gel Packs
