

Angiotensin, Canine, Rat

Angiotensin (1-7), DRVYIHP, an enzymatically produced peptide of the renin-angiotensin system, shows pharmacologically distinct, tissue-specific actions that differ from those of angiotensin II. Angiotensin (1-7) shows considerable cardiovascular and antiangiogenic activity. Iusuf et al. reviewed its pharmacological properties and pharmacotherapeutic perspectives. Moreover, the heptapeptide was shown to inhibit the growth of human lung cancer cells in vitro and to reduce the size of human lung cancer xenografts in vivo.

Catalog No.	5991080
Size	
Product Category	Catalog Peptide
Sequence	H-Asp-Arg-Val-Tyr-Ile-His-Pro-OH
CAS No.	51833-78-4
Mol. Formula	C ₄₁ H ₆₂ N ₁₂ O ₁₁
Mol. Weight	899.03
Purity	> 95%
MOQ	1 mg
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
