

G-Q

The dipeptide Gly-Gln, which is naturally derived from the posttranslational processing of β -endorphin, exhibited an inhibitory action on cell firing when applied iontophoretically to brainstem neurons in the rat. Moreover, it seems to be a neurotrophic regulator of acetylcholinesterase in the mammalian sympathetic ganglion. Gly-Gln suppressed morphine withdrawal symptoms in rats.

Catalog No.	5991247
Size	
Product Category	Catalog Peptide
Sequence	H-Gly-Gln-OH
CAS No.	13115-71-4
Mol. Formula	C7H15N3O5
Mol. Weight	221.21
Purity	> 95%
MOQ	5 mg
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
