

DNAJB2 blocking peptide

Blocking peptide binds specifically to the target antibody and block undesirable antibody binding. This occurs because the peptide resembles the epitope for which the antibody is specific, therefore, the antibody binds to the blocking peptide are no longer able to bind to the epitope in the protein.

Pre-adsorption with blocking peptide greatly improves the results and it is extremely useful in immunohistochemistry (IHC) or in Western blotting (immunoblotting) when non-specific binding is an issue.

This peptide is recommended to block anti-DNAJB2 Antibody (Catalog no. 4073580) reactivity

Directions for Use: Blocking Peptide to the diluted primary antibody in a molar ratio of 10:1 (peptide to antibody) and incubate the mixture at 4°C for overnight or at room temperature for 2 hours

Catalog No.	5073580
Size	1mg
Product Category	Blocking Peptide
Gene Symbol	DNAJB2
UniProt ID	P25686
Purity	>85%
Synonyms	HSJ1; HSPF3; Dnaj homolog subfamily B member 2; Dnaj protein homolog 1; Heat shock 40 kDa protein 3; Heat shock protein J1; HSJ-1
Storage/Stability	-20°C/1 year
Shipping	Gel Packs
