

DNAfect-II

DNAfect-II transfects DNA into COS, HepG2, PC12, NIH3T3, Jurkat, PC-12, HUVEC, primary human pancreatic islet cells, primary rat and hamster hepatocytes, primary rat cardiomyocytes, primary male rat germ cells, primary chick retinal neurons, primary rat fibroblasts, primary human keratinocytes, and tracheobronchial cells. No significant toxicity was observed at working concentrations on the cell lines tested. 1mL of DNAfect-II is sufficient for 250 transfections in 35-mm plates.

Catalog No.	590022
Size	1ml
Product Category	Transfection Reagent
Storage/Stability	2 ~ 8°C/2 years
Shipping	Gel Packs
