

Mouse Angiotensin 1-9 (Ang1-9) Rapid ELISA kit

This Rapid ELISA kit applies Competitive Inhibition enzyme immunoassay technique for the quantitative detection. The micro ELISA plate provided in this kit has been pre-coated with Mouse Ang1-9. During the reaction, Mouse Ang1-9 in the sample or standard competes with a fixed amount of Mouse Ang1-9 on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Mouse Ang1-9. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm \pm 2 nm. The concentration of Mouse Ang1-9 in tested samples can be calculated by comparing the OD of the samples to the standard curve.

Catalog No.	3533409
Size	96-Well Tests
Product Category	Rapid ELISA
Reactivity	Mouse
Sample	Serum; Plasma; Tissue Homogenate; Other Biological Samples
Assay Method	Competitive Inhibition ELISA
Assay Duration	45 min
Sensitivity	9.38 pg/mL
Standard Curve Range	15.63-1000 pg/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
