

Rat Arachidonate 12-Lipoxygenase (12-LO) Rapid ELISA kit

This Rapid ELISA kit applies Sandwich enzyme immunoassay technique for the quantitative detection. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat 12-LO. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat 12-LO and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat 12-LO, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of $450 \text{ nm} \pm 2 \text{ nm}$. The OD value is proportional to the concentration of Rat 12-LO. You can calculate the concentration of Rat 12-LO in the samples by comparing the OD of the samples to the standard curve.

Catalog No.	3542465
Size	96-Well Tests
Product Category	Rapid ELISA
Reactivity	Rat
Sample	Tissue Homogenate; Cell Lysate
Assay Method	Sandwich ELISA
Assay Duration	1.5H
Sensitivity	0.94 ng/mL
Standard Curve Range	1.57-100 ng/mL
Storage/Stability	-20°C/1 year; 4°C/6 months
