

REAL-Mag™ Saliva DNA Isolation Kit

The Magnetic Nanoparticles provide large surface area and highly specific nucleic acid binding capacity resulting in purification of high quality nucleic acids from various strains.

REAL-Mag™ Saliva DNA Isolation kit allows rapid and robust purification of genomic DNA. The purified DNA is most suitable for all downstream applications such as PCR, Real time PCR, Restriction digestion, Sanger sequencing, NGS and Southern blotting.

Catalog No.	131016
Size	50 preps / 100 preps
Product Category	Nucleic Acid Isolation
Storage/Stability	2 ~ 8°C/1 year
Shipping	Ambient
