

REAL-Prep™ Tissues RNA Isolation Kit

REAL-Prep™ Tissue RNA Isolation kit provides a spin column method for the isolation and purification of RNA, free from DNA, proteins and nuclease. The protocol is simple; after homogenization, RNA is bound to the spin columns and eluted. The isolated RNA is suitable for direct use in most downstream applications such as PCR, RT-PCR, one-step RT-qPCR and sequencing.

Catalog No.	141008
Size	50 preps / 100 preps
Product Category	Nucleic Acid Isolation
Storage/Stability	Ambient & -20°C/1 year
Shipping	Ambient & Gel Packs
