

REAL-Mag™ Tissues RNA Isolation Kit

The Magnetic Nanoparticles provide large surface area and highly specific nucleic acid binding capacity resulting in purification of high quality nucleic acids from various strains. REAL-Mag™ Tissues RNA Isolation kit allows rapid and robust purification of RNA. The purified RNA is free from contaminations and other impurities such as nucleases and proteins; suitable for direct use in most downstream applications such as PCR, RT-PCR, one-step RT-qPCR and sequencing.

Catalog No.	142008
Size	50 preps / 100 preps
Product Category	Nucleic Acid Isolation
Storage/Stability	2 ~ 8°C/1 year
Shipping	Ambient
