

5x Tris-Glycine Buffer

Tris-Glycine Buffer is intended for use as the running buffer in SDS-PAGE of proteins. It is the most commonly used as the electrophoresis buffer during the stacking and resolve process of SDS-PAGE.

The buffer consists of Tris Base, Glycine & SDS in recommended concentrations. The buffer is supplied in 5x concentrate and should be diluted prior to use in electrophoresis. The components of 5x Tris-Glycine running buffer are 125mM Tris; 1.25M Glycine; 0.5% (W/V) SDS.

Catalog No.	502131
Size	500mL
Product Category	SDS-PAGE Buffer & Reagent
Storage/Stability	Ambient/1 year
Shipping	Ambient
