

Cytoplasmic Protein Extraction Kit

Cytosolic protein extraction kit is used to extract cytoplasmic proteins from mammalian tissues and cells. The lysate in the kit contains protease inhibitors and phosphatase inhibitors. The kit is ideal for the immunoblotting and other basic researches and it is not recommended for the protein kinase and phosphokinase.

Kit Components:

1. Lysis Solution: 50mL
2. Phosphatase Inhibitor [100x]: 0.5mL
3. Protease Inhibitor [100x]: 0.5mL
4. PMSF [100x]: 0.5mL

Catalog No.	501013
Size	50 preps
Product Category	Protein Extraction
Storage/Stability	2 ~ 8°C & -20°C/1 year
Shipping	Gel Packs
