

Poly-HRP/DAB Detection Kit (universal)

Poly-HRP/DAB is highly sensitive and specific, non-biotin, polymer-based detection system which significantly reduce or shows no background on tissues containing high levels of avidin, biotin. The system is based on an HRP labeled polymer, which is conjugated with secondary antibodies.

This universal kit is intend to use with primary antibodies raised against mouse or rabbit for the qualitative identification of antigens by light microscopy in normal and pathological paraffin-embedded tissues, cryostat tissues or cell preparations.

Catalog No.	506203
Size	200 sections
Product Category	Immuno Detection
Kit Components	1) Blocking Serum (20mL) 2) Poly-HRP Goat anti-Mouse/Rabbit IgG (15mL) 3) 20x DAB Reagent-A (1mL) 4) 20x DAB Reagent-B (1mL) 5) DAB substrate (20mL)
Storage/Stability	2 ~ 8°C / 1 year
Shipping	Ambient
